### **C-SAMS Molding Equipment – PC Operating System**

From the inception in 1990 the Universal Joint and Universal Coupling have been molded using the Tyco Telecommunications (US) Inc. SAMS molding equipment.

In 2001 the C-SAMS PC based controller was introduced as the successor to the original CIMAC controller.

The C-SAMS PC based controller is driven by standard PC based computers running Microsoft Windows ® 98, NT, 2000 and XP operating system.

Over the course of time improvements to the C-SAMS equipment and control software have been made and now Tyco Telecommunications (US) Inc. believes that the time is right to phase out the support for systems using PC computers operating with certain versions of Windows ® and Office

From Jan 1 2007 the UJCM CD will contain software for the C-SAMS Controllers that will only run on Laptops loaded with Windows ® XP Professional SP2 ( or newer) and Office 2003. All previous versions of the C-SAMS will be phased out.

If you require any additional details about the upgrade then please contact:

Joe Man
