Heated Die Elastomer Stripper Precision Die Holder Kit (Fluorosint) (KIT 248AA)

The UJC would like to announce the launch of the Precision Die Holder Kit (KIT248AA) to be used with the Heated Die Elastomer Stripper for ASN NL & S3, Tyco SL21E & SL17E and Pirelli 14mm & 18.5mm cables. The dies in this kit are an enhancement and have been designed to provide a high tolerance match with the elastomer packages and hence provide an improved strip. The UJ Consortium recommend that each die holder/die block assembly is used for one joint (two cable ends) only.

The Precision Die Holder Kit contains Die Holders and 60 Die Blocks, 30 of each type and three lengths of Teflon Tubing. The kit is available now from the UJC

For further information please contact the UJC.
