Armour Protection Kit Clarification for Double armoured Cables

The UJC would like to provide further clarification on the armour protection kits required for double armoured cables.

Some of the newer Double Armoured cables have smaller outside diameters than the earlier types and hence use Single Armour buffers, instead of Double Armour (DA) Buffers, which are not included in the End Specific Kit (ESK). This Bulletin supplements UJC Bulletin 027 and clarifies which Protection Kits are required for each Double Armoured cable.

Double Armoured cables that use Double Armoured buffers: The buffers are located in the End Specific Kits. Only Armour Protection Kit KIT10060 is required.

Double Armoured cables that use Single Armoured buffers (except Ericsson GJMLTV): The buffers are located in KIT10070, so both KIT10060 and KIT10070 are required.

Ericsson GJMLTV Double Armoured cables: The single Armour buffers are located in the End Specific Kits. Only Armour Protection Kit KIT10060 is required.

Double Armour (DA) Cable Type	KIT10060	KIT10070
ASN OALC5, ASN URC2, ASN OALC4 MDA Tyco SL125, Tyco SL17 DA-HS & DA-HA (Older kits) Ericsson GASLMLTV Ericsson GJMLTV NSW Minisub 16C NSW Minisub R Nexans ROC-1	Required	Required
Ericsson GJMLTV [The SA buffer is included in the End Specific Kit]	Required	
All other DA cables [DA buffer included in the ESK]:	Required	

This and other cable specific information is available from the Subscriber Section of the UJC website. Subscribers also receive the quarterly UJ & UQJ Explorer CD ROM which contains the latest Construction Manual documentation, toolkits Bill of Materials, cable qualification listings and much more. If you would like to receive the UJ & UQJ Explorer and have access to the Subscriber Section of the website, please contact the UJC Coordinator at coordinator@ujconsortium.com.

For further information please contact the UJC.
