UJ Consortium

URC1 Cable Tension Limitations

In order to assist with the flow of information on cable characteristics the UJ Consortium would like to remind its customers that the following URC1 cable combinations are qualified to 500m operational depth (or 150kN equivalent resulting recovery load).

URC1 DA1

URC1 DA2

URC1 HA

Should you require further information regarding URC1 cable tension limitations then please contact:

Mr Franck Tortey

Alcatel Submarine Networks,
535, quai de la Loire – BP 849
62225 Calais Cedex

France
