### New UJ/UC Fusion Splicer UJS-S100

On behalf of KDDI-SCS, the UJ Consortium is pleased to introduce a new UJ/UC Fusion Splicer the UJS-S100. This Splicer will eventually replace the Type-35SE UJ/UC and to aid with this transfer the following schedule has been arranged

### Schedule of Events:

The Fusion Splicer UJS-S100, Video Printer and Tool Kit are now available to order

Acceptance of orders for the Fusion Splicer Type-35SE UJ/UC will cease 31<sup>st</sup> March 2002

From the 1<sup>st</sup> April 2002 support and calibration of the Type-35SE UJ/UC will be discontinued

The Maintenance and Calibration Services for the UJS-S100 will also be provided by the established UJ/UC Maintenance Centers located in the United Kingdom, USA and Japan

### UJ/UC Fusion Splicer UJS-S100, Summary of Characteristics:

- Splice loss improvement
- Faster splice and reinforcement
- New fiber handling system
- High long-term reliability of the spliced area
- Present combinations of UJ qualified fiber are applicable
- Simple data handling system
- More compact for ease of portability
- 14% reduction in price compared to the Type-35SE UJ/UC
- In general a lead time reduction of 8 weeks
